

MOBILE LUXURY MARINE APPLICATION USES EYESOFT

Luxury shipbuilder chooses Bikal Eyesoft to record up to 48 camera on board luxury yacht.

Helsinki, Finland, 6th August 2010. Baltic Yachts, a specialist Yacht company providing luxury sea vessels to the rich & famous required on on-board surveillance application for its boats.

EyeSoft surveillance software was used to monitor cameras installed on the yachts. Combined with touch screen monitors, boat users were easily able to use & navigate EyeSoft while at sea. In addition, EyeSoft provided high quality video footage recorded with the VC-1 codec which was easily transportable allowing the client to move files to memory stick or mobile phone and play on almost any machine with Windows Media Player or the free bundled playback software.

Because EyeSoft uses the industry standard recording format for Blu-Ray, VC-1 and files are saved in the media format .asf, the customer was assured of high standards in his recorded images and was comfortable to use multiple devices on which to view his video including his PC, mobile phone and TV. EyeSoft's live monitoring & Playback features are also useable on touch screen devices making the software useful in a variety of operational conditions.
