

## **Today, UK Bikal celebrates 8-months of Eyesoft exclusive partnership with E-motive**

London- February 2, 2011,

Since eight months, UK Bikal IP CCTV Ltd works in exclusive partnership with E-motive in Poland on innovative and high quality software Eyesoft. This easy use network video surveillance software is designed for small to large scale IP video surveillance systems with powerful features.

The partnership will, initially, work to distribute Eyesoft within the region by responding to the enquiries that Bikal generates through its marketing within the industry. But E-motive is more than a simple reseller: he also provides technical support and system integration within the region in order to fully satisfy customer needs for home to business enterprises.

“It took us 2 months to learn the features of the software and to test the hardware requirements to ensure we were fully prepared to take on the responsibility”, stated Mr. Piotr Kucharz will lead the region as the CEO of E-motive. “As an exclusive Eyesoft reseller in Poland, we are proud to provide a new service to the local market in which we have been working for a long time. Our IT experience is a perfect complement to Bikal IP CCTV”, he added.

As a pioneer of IP CCTV in the UK, Bikal’s aim is not to rely solely on the UK market but to expand globally. “E-motive is partner of choice in our international strategy to extend the brand and the marketing to different regions and our discussions with E-motive has led to a partnership on both a technical and customer services level”, stated Group CEO, Mr. Raj Sandhu.
