

SURVEILLANCE SYSTEM AT PHASE II PORT OF FUJAIRAH, UAE

Bikal aids with a key port installation with their local partner based in Abu Dhabi. The system will aid a terminal mainly trading in energy commodities.

Abu Dhabi, 18th May 2010, Fujairah is one of the world's most important bunker regions and incorporates the United Arab Emirates ports of Khorfakkan to the north and Kalba to the south. The Fujairah market is estimated to trade approximately 12 million metric tons of oil, oil product and bunker fuel per annum.

In conjunction with the main contractor for the project, Topaz Hydrospace (NICCO international) Emirates Net with Bikal is to provide an explosion proof CCTV system for the phase II of the project, this project will be executed in July and will be commissioned by the end of August 2010. For this project Emirates Net with Bikal has signed up a leading supplier of specialized housings for CCTV in the UK, Emirates Net with Bikal has been certified as the specialist installer of these cameras for the GCC region.

Speaking about the project, Shihab Shaideen – VP Strategic Sales said “We have been active in state of the art surveillance systems for many years now. The award of this contract is a major accolade and recognition of what we have achieved, and we look forward to continuing our success and working alongside Topaz Hydrospace”

“Winning major projects gives us tremendous confidence and places us on par with other major solution providers. This empowers us to undertake projects that our more exigent, while at the same time reiterate our commitment to clients in providing them up-to-date technology and unmatched services,” explains Emirates Net Systems and Bikal Middle East LLC CEO Shaik Hamdan.
